

Diapering Procedure

1. Get supplies ready

- Change table equipped with a belt
- Hand sink with soap & paper towel
- Diaper, baby wipes, applicators & creams
- Sanitizing solution (labelled for diapering)
- Paper liner

2. Place the child on the clean change surface

Place the child on the paper and fasten the safety belt. Never leave the child unattended. Remove and discard soiled diaper.

3. Clean the child's skin and apply the diaper

Clean skin with a single-use towel, wiping from **front to back**.

If applying ointment, use a single use applicator for ointments or creams.

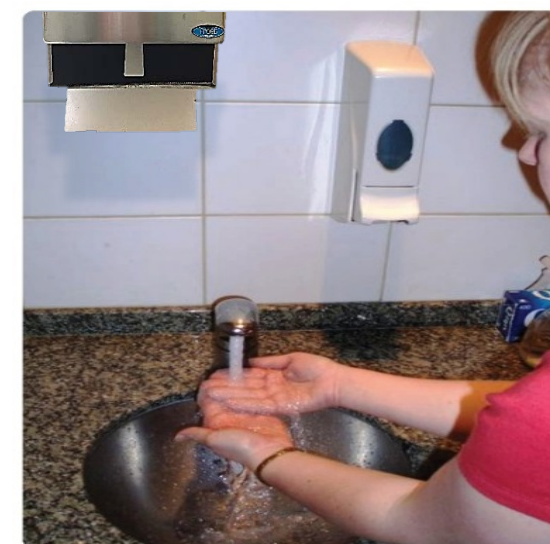

4. Dress child, wash and dry hands with paper towel

5. Clean & disinfect the change surface

If there is visible contamination, first clean the surface with hot water and soap.

Make a sanitizer by adding 2 ml (1/2 teaspoon) household bleach per liter (4 cups) of water or approved 0.5% accelerated hydrogen peroxide.

6. Wash your hands with soap and warm water
